

# Plat FORMS

The web  
development  
platform  
comparison

## Plat\_Forms 2007: Some results

2007-06-20

# Purpose of Plat\_Forms

- There are many different web development platforms
- Different people claim different pros and cons for them
- It is hard to find neutral information how they compare
- **Plat\_Forms provides such information**

# How?

- 9 Teams of 3 meet in one place
  - January 25-26, Congress Center Nürnberg
- Each builds the same system within 30 hours

# Who: Teams

- Team 3 **Java**:  
**abaXX Technology** (abaxx.de)
- Team 4 **Java**:  
**Accenture Technology Solutions** (accenture.de)
- Team 9 **Java**:  
**Innoopract Informationssysteme** (innoopract.de)
- Team 6 **PHP**:  
**OXID eSales** (oxid-esales.com)
- Team 7 **PHP**:  
**Globalpark** (globalpark.de)
- Team 8 **PHP**:  
**Zend Technologies** (zend.com)
- Team 1 **Perl**:  
**Etat de Genève/Optaros** (ge.ch, optaros.com).
- Team 2 **Perl**:  
**plusW** (plusw.de)
- Team 5 **Perl**:  
**Revolution Systems** (revsys.com)

# What: "People by Temperament" Registration for community portal

## People by Temperament

# What (2): Trivial Temperament Test (TTT)

- After registration, members can take the TTT personality test
  - to determine their MBTI personality type

"The whole is more than the sum of its parts" ...

- is a saying that I never found very convincing
- is a very important observation

A small project ...

- allows to jump right in
- should be planned as well as a big one

Abstract art ...

- is often very interesting
- tends to annoy me

# What (3): Search for members

- Search for members by complex criteria

**Search**

**Please specify the criterias you want to search for:**

Members who...

...are not my Contacts

...not got an RCD from me

...have registered during the last [days]:

...have done their TTT since [days]:

...are only in my country.

...live around me in [km]:

...have following TTT Type [mult. select] \*:  
 ESTJ  
 ESTP  
 ESFJ  
 ESFP  
 ENTJ  
 ENTP  
 ENFJ

...have same primary Enneagram type as me

...have one of my Enneagram types

...have related Enneagram types

# What (4): Member list (e.g. for search results)

**Result**

	Username	Email	Full name	Town	Country	User's motto	MBTI	Enneagramm
<input type="checkbox"/>	<a href="#">ulisoap</a>	<not shown>	<not shown>	Berlin	Germany	foo bar	N/A	none
<input type="checkbox"/>	<a href="#">ulis</a>	<not shown>	<not shown>	Berlin	Germany	foo bar	N/A	none
<input type="checkbox"/>	<a href="#">&amp;#964;&amp;#949;&amp;#955;&amp;#953;&amp;#954;&amp;#940;</a>	<not shown>	<not shown>	Berlin	Germany	will	N/A	none

**Chart**

MBTI:  
Your Keirsey type:  
Last TTT result:  
Date of test:  
[▶ Take a new test](#)

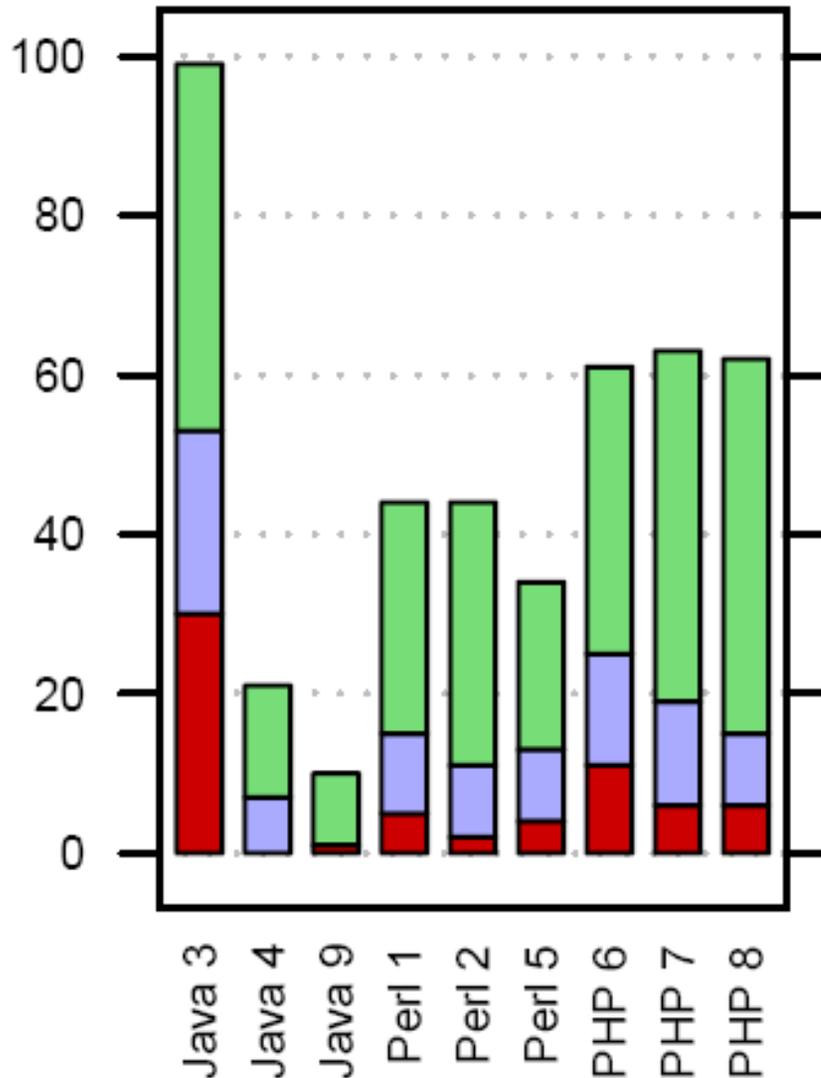

# What (6): Further requirements

- The above screenshots showed a solution for the 108 Web GUI requirements
  - the one delivered by team3 Java (abaXX Technology)

in addition, there were

- 19 requirements regarding a SOAP webservice interface
- 19 non-functional requirements
  - browser compatibility, performance, etc.
- 5 rules describing the form of solution delivery
  
- Each requirement was marked with priority MUST, SHOULD, or MAY

# Results 1: Completeness of solutions

## GUI requirements

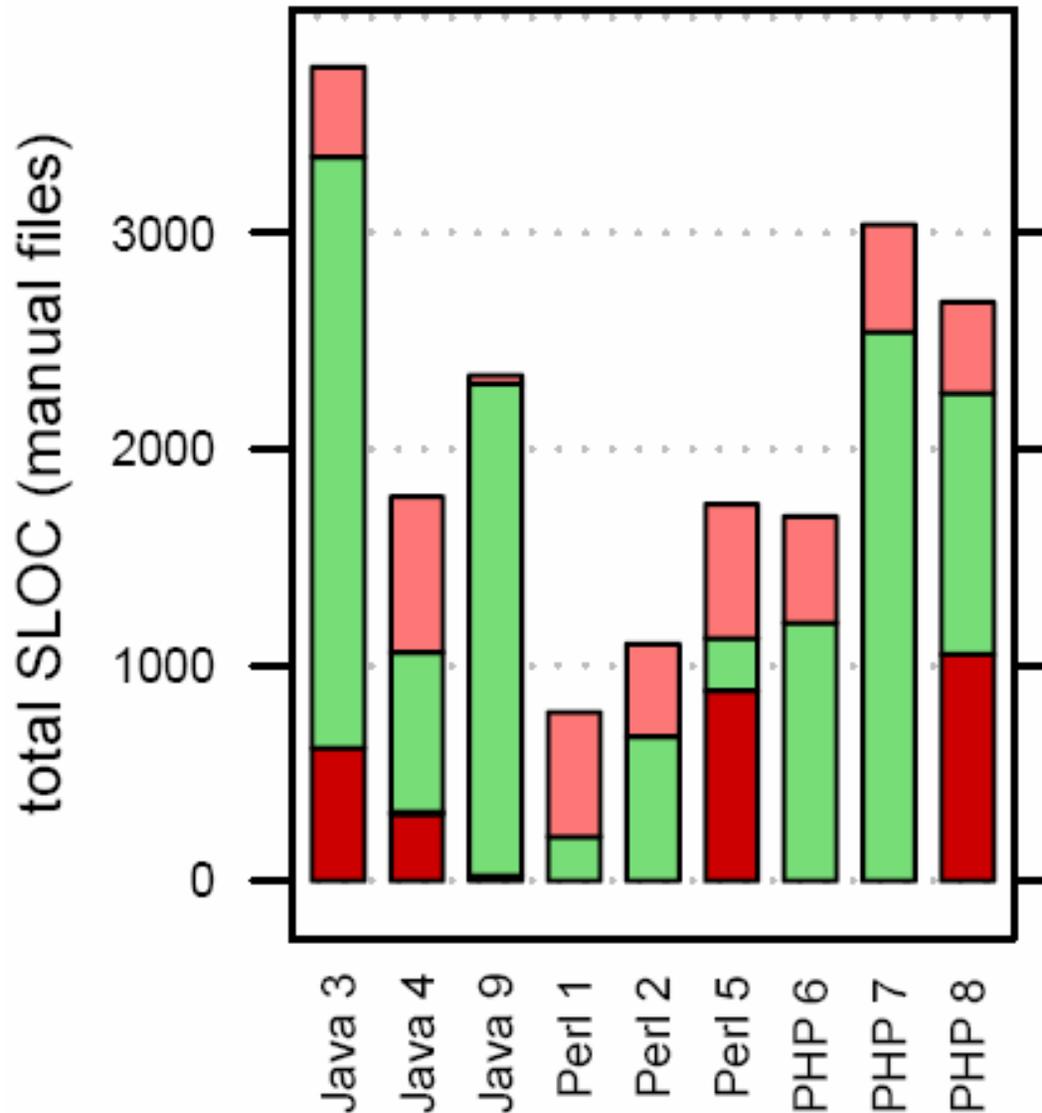

MUST  
SHOULD  
MAY

Note:

- Team Java 4 was hampered by a huge VMware setup problem for almost a full day
- Team Java 9 used a framework still in alpha development (RAP)

# Results 2: Size of solution

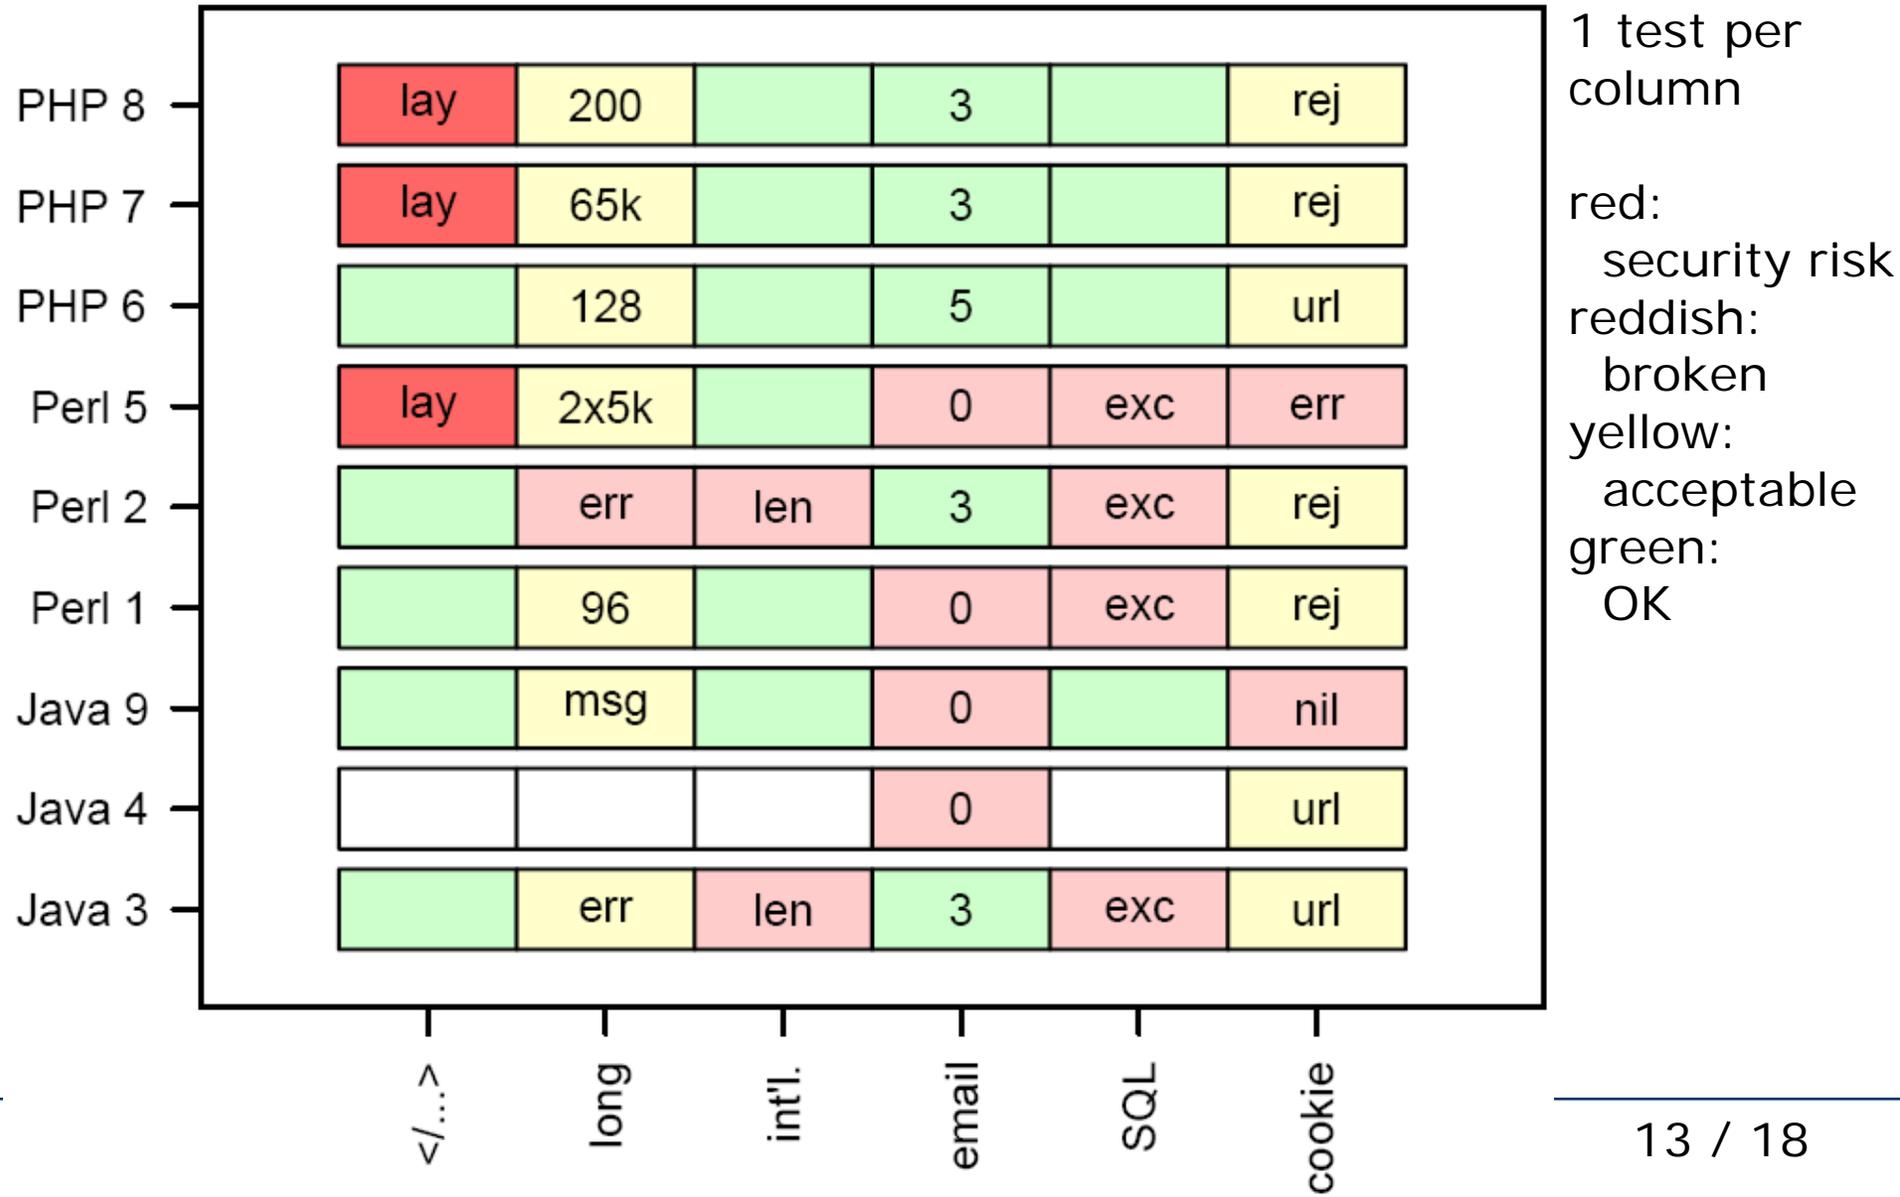

source lines-of-code

templ  
prog  
doc  
data

Note:  
Further manually written  
source code resides in  
modified reused files.

# Results 3: Robustness and Security

## Results: Other

- Many other aspects were compared
  - Ease-of-use
  - Correctness/reliability
  - Modifiability, solution structure
  - Team behavior during the development process
  - Teams' self-reported subjective experience
- Some of them exhibit further platform differences
  - in particular often smaller variance among the PHP teams

## More information

For details, please refer to the full Plat\_Forms result report:

Lutz Prechelt:

*"Plat\_Forms 2007: The Web Development Platform Comparison – Evaluation and Results",*

Freie Universität Berlin, Institut für Informatik,  
Technical Report B-07-10

see <http://www.plat-forms.org>

# Winning teams

- We do not have an overall winner
  - because people would readily infer a "best platform" from it

But we do have a winner per platform:

- Java:           **abaXX Technology**           (team3)
  - in particular for highest completeness
- Perl:           **Etat de Genève/Optaros** (team1)
  - for best balance of characteristics
- PHP:           **OXID eSales**           (team6)
  - in particular for highest robustness

# Who: Organizers and Sponsors

- Organizers:

- Gold Sponsor:

- Silver Sponsors:

*High performance. Delivered.*

# Thank you!
